With the limited information presented the Grafton Sewer Department will have no formal comments until a complete plan showing estimated flows, elevations, and profiles is provided.

At this time the DPW would like the board to be aware that after more than eight years of planning the ten-million-dollar reconstruction and improvements project of Main Street is scheduled to begin in the late spring or early summer 2021. The required off site drainage improvements will need to be installed prior to the Main Street reconstruction project.
